

Equipped with a flange

OCK1-1

Global standard sensor for microwave ovens

Features	<ul style="list-style-type: none"> Max. temperature up to 300°C Exposed in an oven chamber
Applications	Microwave oven chambers
Operating temperature	-20 to +300°C (from the tip of protection tube to the flange)
Thermal time constant	$\tau \approx 80$ sec.
Dissipation constant	$\delta \approx 2.1 \text{ mW}/^\circ\text{C}$
Withstand voltage	1200VAC for 1 sec.
Insulation resistance	Min. 100M Ω at 500VDC
Resistance	R200 = 1k Ω Other options available
B constant	B100/200 = 4537K Other options available

OCK2-1

Fast response solution for microwave ovens Response is compared to other Shibaura flange type sensors

Features	<ul style="list-style-type: none"> The second generation oven sensor Outstanding accuracy and response solution for oven temperature control Glass-encapsulated thermistor elements which withstand high voltage are available
Applications	Microwave oven chambers
Operating temperature	-20 to +300°C (from the tip of protection tube to the flange)
Thermal time constant	$\tau \approx 60$ sec.
Dissipation constant	$\delta \approx 2 \text{ mW}/^\circ\text{C}$
Withstand voltage	1200VAC for 1 sec. Consultation up to 2000VAC
Insulation resistance	Min. 100M Ω at 500VDC
Resistance	R200 = 1k Ω Other options available
B constant	B100/200 = 4537K Other options available

OCK3

Multi-detection with high sensitivity and response Sensitivity and response are compared to other Shibaura flange type sensors

Features	<ul style="list-style-type: none"> A multi-detector for temperature, vapor and air flow speed
Applications	Microwave oven chambers (air & vapor), heaters
Operating temperature	-20 to +260°C (from the tip of protection tube to the flange)
Thermal time constant	$\tau \approx 10$ sec. (on an aluminium hot plate)
Dissipation constant	$\delta \approx 1.2 \text{ mW}/^\circ\text{C}$
Withstand voltage	1200VAC for 1 sec.
Insulation resistance	Min. 100M Ω at 500VDC
Resistance	R200 = 1k Ω Other options available
B constant	B100/200 = 4537K Other options available

ST1

High heat resistance Heat resistance is compared to other Shibaura flange type sensors

Features	<ul style="list-style-type: none"> One-piece protection cap Standard burner sensor available with a highly heatproof glass-encapsulated thermistor element
Applications	Heater burners
Operating temperature	-20 to +500°C (from the tip of protection tube to the flange)
Thermal time constant	$\tau \approx 80$ sec. $\tau \leq 7$ sec. (in oil to the flange)
Dissipation constant	$\delta \approx 3 \text{ mW}/^\circ\text{C}$
Withstand voltage	1200VAC for 1 sec.
Insulation resistance	Min. 100M Ω at 500VDC
Resistance	R200 = 8k Ω Other options available
B constant	B150/250 = 5300K Other options available
